BLOOD BANK REPORTING

- Blood Usage evaluation
- Use of Autologous PRBC in Elective Surgeries
- Transfusion Reaction Rate

Indicator	Jan-Mar 11
Major Joint Encounters	221
Major Joint Encounters w/ Autologous Blood Use	2
Major Joint Encounters w/ Allogeneic Blood Use	79
Percent Major Joint Encounters w/ Blood Usage	36.652

QUALITY MONITORING – UNITS MEETING CRITERIA

Process:

- Transfusion Information is interfaced into the blood bank module
- Worklist notification of transfusion (Sampling)
- Reviewer reviews associated lab work
- Determine if episode meets criteria
- Complete 'Justified' field for component
- Optional: enter transfusion criteria that was met

WORKLIST RULE - NOTIFICATION OF TRANSFUSION (ANY TYPE) (SAMPLE)

LAB INTERFACE--WORKLIST TRIGGERS

LAB ALERT VARIATIONS

Low	Critical	Positive	Negative	Elevated
Glucose <i>Insulin Management</i>	Potassium <i>Medication Management</i>	C Diff	Rapid Strep Screen	Elevated Bilirubin
Digoxin Level <i>Medication Management</i>	Calcium	Tuberculin <i>Isolation precautions-Reporting requirements</i>	Rapid Influenza- <i>Care management</i>	Digoxin – <i>Medication Management – Need for Community Case management</i>
INR <i>Medication Management</i>	Hemoglobin		C Diff <i>Medication management</i>	CEA <i>Community Case management</i>

SMARTRACK WORKLISTS

- Site Specified, Automated Alerts
 - Presence of specific pathogens
 - Re-admits
 - Critical lab values
- Single field or multiples fields can be combined for Alerts
- Efficiently & Effectively Manage Workflow
- Automated Critical Event Alerts

EXAMPLES OF WORKLIST RULES

- Laboratory
 - Rapid influenza positive
 - MRSA growth on wound culture
- Encounter
 - Readmissions
 - LOS > x days
- IHI Global Triggers for Adverse Events
 - Positive Blood Culture
 - Infection of any kind (CL, SSI, UTI)
 - C. diff +
 - Pneumonia in ICU

WORKLIST EXAMPLE

	Patient	Location	Room	Type
Infection Preventionist	Madaya, Christina	3100 East	15302	I
	<i>MRSA - Verify Isolation/Antibiotic</i>			
	<i>Vitamin K Admin, Check for Prolonged INR & Bleeding</i>			
Risk Analyst	Rachwitz, Everett	3300 East	234	I
	<i>Elevated CEA - Enter CCM Problem</i>			
Quality Specialist	Early, Jonnie	3300 East	25602	I
	<i>Influenza Negative - Verify DC Screens</i>			
	<i>Benadryl Admin, Check for Allergic Rx</i>			
Case Manager	Kaiser, Jessica	3300 East	26502	I
	<i>Elevated Hgb A1C - Enter CCM Problem</i>			
Cardiac Nurse Case Manager	Page, Marcus	3300 West	21402	I
	<i>Elevated Troponin - Enter Core AMI Focus</i>			
	<i>Romazicon Admin, Check for Benzodiazepine Admin</i>			
Performance Improvement Coordinator	Jablonski, Marcia	3300 West	22202	I
	<i>Critical Digoxin Level - Enter ADR</i>			
	Wagner, Arnold	3700 West	40702	I
Neonatal Nurse Practitioner	<i>Elevated BNP - Enter Core CHF Focus</i>			
	<i>Narcan Admin, Check for Narcotic Overdose</i>			
	Bennett, Baby Girl	Nursery	NUR-1	I
	<i>NB Low Cord pH - Enter QM Event</i>			
	Nolan, Baby Boy	Nursery	NUR-3	I
	<i>NB Elevated Bilirubin - Enter QM Event</i>			
	<i>NB Low Glucose - Enter QM Event</i>			

OUTPATIENT DATA - CONTINUUM OF CARE

- PSA level in males > age 50
- LDL-C level in Diabetes Mellitus
- HgbA1C in Diabetes Mellitus
- HCT in ESRD
- Lipid Profile in CAD
- Urine Albumin in Diabetes Mellitus

PT SAFETY –IHI 5 MILLION LIVES

Indicator	Jan 2008	Feb 2008	Mar 2008	Apr 2008	Total
Total Positive Clostridium Difficile Toxin Specimens	19	30	17	0	66
Total Elevated Partial Thromboplastin Time Studies	6	7	9	0	22
Total Elevated Internationalized Normalized Ratio Studies	6	8	8	0	22
Total Low Blood Glucose Studies	7	9	5	0	21
Total Instances of Vitamin K Administration	10	12	9	0	31
Total Instances of Benadryl Administration	17	16	40	0	73
Total Instances of Romazicon Administration	1	0	3	0	4
Total Instances of Narcan Administration	5	3	3	0	11
Total Instances of Antiemetic Administration	54	79	67	0	200

SMARTTRACK INDICATOR EXAMPLES

- Patients with Infections
- Encounters with Infections
- Total Infection Episodes
- Total Patient Days
- Infections by Type
- Infections by location (unit)
- Reportable Infections
- Provider specific infection rates (use on reappointment profile)
- HAI Rate (total, Proc, Loc)
- Infections by wound class
- Critical Care Module
 - Device days (vent, CL, foley) – or use manual indicators
 - Days at risk

SMARTTRACK INDICATOR EXAMPLES

- Percent of central line associated primary bloodstream infections per 1000 central line days by unit
- Rate of post-operative sepsis per 1000 elective surgical discharges
- Incidence of bacterial pneumonia
- Rate of hospital acquired urinary track infections
- Percent of patients with documented infection placed in appropriate isolation precautions
- Automated reporting of communicable diseases to state agencies
- Incidence of ventilator associated pneumonia by unit
- Rate of C.Diff positive cultures by unit
- Ratio of hospital acquired to community acquired *Acinetobacter baumannii* infections

Dashboard Scorecard Examples

Figure piMD-8: Midas+ Statit piMD Dashboard.

Quality View: All Public

Status	Indicator	Current Value	Target	SPC Alert	Updated
Quality					
Red	Nosocomial C. Difficile Rate	2.00	1.00		Apr 09
Red	Nosocomial MRSA Rate	1.22	1.00		Apr 09
Red	Readmit Within 14 Days of DC	15.3%	14.0%		Q3 09
Red	Geriatric Average LOS	51.7	47.0		Apr 09
Yellow	Average Length of Stay	4.61	4.50		Q2 09
Green	Inpatient Mortality	3.8%	4.2%		Q2 09

Figure piMD-9: Midas+ Statit piMD Scorecard.

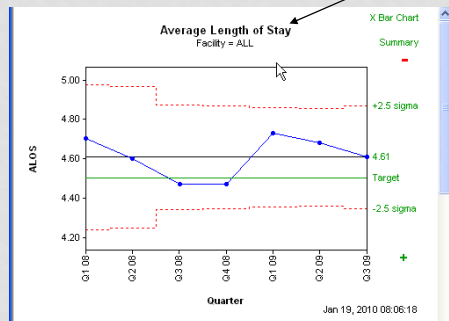

Figure piMD-10: Midas+ Statit piMD Analysis.

Dashboard Scorecards allow for the review of performances at a high-level drilling into the detailed scorecard.

Midas+ Statit has the ability to import data from multiple disparate data sources allowing the user to review performances at a high level and drill into the detailed scorecards.

DOCUMENT GENERATION-LETTER

Infection Control Department
MIDAS General Hospital
4801 East Broadway Blvd
Tucson, AZ 85711

January 26, 2010

Monica Gold
89234 East Calle Monte Vista
Tucson, AZ 95872

Dear Monica Gold:

On 08/02/2007, Ms. Gold had a lab test for an infection in IV Site culture. This was done as an Inpatient at MIDAS Medical Center. The organism that was found was Methicillin Resistant Staph Aureus.

Attached is the information give to patients found to have Methicillin Resistant Staph Aureus in the hospital. At home, good hand washing is the most important way to protect yourself and others to from infection.]

In you have any questions, feel free to call MIDAS Medical Center Infection Control Department at 1-800-455-9898 or call your doctor.

Sincerely,
Jennifer Embrich
MIDAS Medical Center
